

## Amusement Ride Safety Tips for Kids

- Pay Attention
- Ride Safe
- Have Fun!

1. **Read and follow all posted rules**, height/age restrictions, and verbal instructions given by ride operators.
2. **Keep all body parts inside the ride vehicle at all times.** This includes hands, arms, legs, feet, head, etc.
3. **Don't run, climb, or horse around near amusement rides.**
4. **Never throw or drop anything from an amusement ride.** Never try to retrieve items that accidentally fall from rides.
5. **Always use the safety equipment provided**, including grab bars and handrails.
6. **Pull seat belts and lap bars tight, and double-check by pulling up to make sure they're locked.** Alert the ride operator if you need help or you're concerned about the restraint.
7. **Stay seated until the ride comes to a final stop at the unloading point.** If a ride stops before the unloading point, remain inside. Wait for the ride to restart, or further instructions from the operator.
8. **Don't let friends pressure you into riding.** If a ride looks too wild or makes you nervous for any reason, choose another attraction. Don't pressure your friends into riding something that scares them.
9. **Don't wear long, baggy clothes, dangling drawstrings or jewelry.** Wear comfortable walking shoes.
10. **Stop riding before you get tired.**
